INNOVATIVE TECHNOLOGY REPLACING GUARDS MEANS REAL COST SAVINGS!

RealGuard towers record multiple cameras 24x7, and a secure wireless connection links to remotely located security officers when after-hours intruder movement is detected.

- Replaces on site security guards and random mobile patrols.
- Latest technology infrared cameras provide clear pictures day and night.
- Long range movement sensors detect intruder movement and trigger live video back to RealGuard.
- Remotely located RealGuard licensed security officers quickly identify intruders and respond accordingly.
- Reduced risk exposure helps contain insurance costs.
- If a potential criminal event is viewed, intruders are warned off over PA speakers and police are called (police will respond to confirmed criminal events in progress).
- 98%+ of identified intruders immediately vacate the site 'stopping crime before it happens'.
- Solar, diesel, or 240volt towers can operate anywhere where 3G or 4G wireless connectivity is available.
- RealGuard towers never sleep, and can be rapidly deployed wherever and whenever needed.
